

RPS Lab environment

1. Login to the LMS:

- I go to <https://digital.rpsconsulting.in> on my browser.
- I log in with my email (kumarjd7799@gmail.com) and the password I set after the first login.

2. Find the Course:

- Once I'm logged in, I navigate to my course page. This is where all the materials and resources for my course are listed.

3. Access the Lab:

- In the course page, there's a specific section or link for the RPS Cloud Labs. It's usually pretty easy to spot, labeled something like "Launch Lab" or "Start Lab Session."
- I click on this link, which opens up the lab environment.

4. Using the Lab:

- The lab interface usually logs me in automatically, but sometimes I need to enter my LMS credentials again.
- In the lab, I follow the instructions provided to complete my hands-on exercises. The environment is designed to let me practice real-world scenarios, which is really helpful.

5. Get Help if Needed:

- If I run into any issues, I can contact the support team at ngasupport@rpsconsulting.in for help.
